

FLU SHOT CLINIC

1 Day-1 Shot: Glastonbury and Manchester to Host Flu Clinic at Glastonbury Town Hall

On Saturday, January 27, 2018 from 10:00 a.m. to 1:00 p.m., the Glastonbury and Manchester Health Departments will collaboratively host a flu vaccination clinic at Glastonbury Town Hall. The Healthy Choices mobile van will be on-site to provide flu shots to anyone ages 4 years and older. All vaccinations will be administered by licensed and trained professionals, including MDs, nurses, and pharmacists. Trained staff will administer the Flublok quadrivalent influenza vaccine for those individuals 18 years and older. Flublok is manufactured using modern re-combinant DNA technology, and contains no egg proteins or gluten, nor does it contain thimerosal, antibiotics, or latex. For those 4-17 years of age, Flucelvax (egg and preservative free) and Flaurix will be available – both are quadrivalent.

The mobile flu clinic van will be at the Glastonbury Town Hall at 2155 Main Street and is open to the general public. Glastonbury or Manchester residency is not required and all insurance will be accepted. For reduced wait times, interested residents are encouraged to visit www.glastonbury-ct.gov/flushot to download and complete the flu shot form to bring to the clinic. In the event of inclement weather, the vaccination clinic will be held inside at the Academy cafeteria, located at 2143 Main Street, Glastonbury.
