FOR IMMEDIATE RELEASE

Water Demands - Capacity Public Notice

MANCHESTER, CT - The Town of Manchester Water Department would like to make the public aware that, in addition to a slight increase in normal water demands this month, unforeseen water pump issues at the Globe Hollow Water Treatment Plant, has temporarily impacted water pumping capacity.

As a result, the Water Department is asking customers to help conserve water until the installation of replacement pumps later this week. With the dry weather of the past few weeks, there has been a rise in water usage including the watering of lawns, however, cutting back any unnecessary water usage will help until a temporary pump is in place and fully operational sometime later this week. Therefore, we ask that customers, wherever possible, please defer activities that may require large amounts of water until Saturday, June 27th.

With cooperation and conservation, there should be an ample supply of water for normal household use with no interruption of service. Thank you for your cooperation.
