PRESS RELEASE – FOR IMMEDIATE RELEASE

The Manchester Water Department Alerts Residents to Present Water Conditions

The Town of Manchester Water Department is issuing this press release to all citizens, businesses, institutions, and users of the potable water supply because the levels of the Town’s reservoirs have increased to 75.6 percent of capacity due to the recent precipitation and the conservation measures taken by our customers. Although this past year’s average rainfall is still behind the annual average, our reservoir water levels have been steadily increasing in the past few months.

As always, the Department recommends that all users continue to conserve water and repair any leaky plumbing fixtures or replace them with low-flow devices.

We will continue to monitor the level of the reservoirs weekly and would like to thank all of our water customers for their participation in the conservation efforts over the past several months. For further information, please call us at (860) 647-3115 or visit our website at https://waterandsewer.townofmanchester.org/ and click on the “Water Supply Status” link.
